INDEX

For Volume 51

INDEX FOR VOLUME 51

AUTHOR AND SUBJECT INDEX. Junior authorship is indicated by page numbers in parentheses. Page numbers of illustrations are in bold face. A special listing is made of "new species, varieties, etc."

Abbott, E. V. 642
abstracts
Northeastern Division of APS, 1960 574
Pacific Division of APS, 1960 64
Southern Division of APS, 1961 642
acrolein phenylhydrazone, controls Puccinia coronata and P. recondita 77, **78**
aeration of Heterodera glycines, effect on larval emergence 350, **354**
Agrobacterium rhizogenes, detection and identification 69, **70**
Agrobacterium tumefaciens, edaphic factors 607, **609, 610, 611, 612**
Agropyron repens juice, inhibits tobacco mosaic virus 579
Akazawa, T. 668
albinism, heritable in Sphacelotheca reiliana 407, **408**
alfalfa
Corynebacterium insidiosum in, longevity of 260
Fusarium oxysporum in, causes wilt 643
Pseudoplea trifolii in, inoculation by ascospore carriers 261
aliphatic amines, control Penicillium decay of orange 64
Allen, A. S. (576)
almond hull rot disease
fumaric acid content determined by gas chromatography 274, **276**
pathogen roles in 843, **844, 846**
role of fumaric acid in 851, **852, 854, 856, 857**
translocation of toxin in symptom development 66
Alternaria tomato, effect of radiation and temperature on sporulation 803, **804**
American Phytopathological Society
annual report, 1960, 43
special committees 45
standing committees 44
standing rule changes 62, 63
subject matter committees 45
amino acids
composition in anthracnose-infected watermelon 644
free, in scab-infected cucumber 776
in nutrition of Xanthomonas vesicatoria 32
amygdalin, in peach replant problem 10, **11**
Anderson, C. D. (616)
Anderson, L. P. 642
Anderson, P. J. 574
Andes, J. O. 808
annual report, APS, 1960 43
anthracnose infection of watermelon, effects of 644
antibiotics
control black rot of crucifers 495, **498, 500**
filipin 321, **323, 324, 327**
in isolation of Phytophthora 64
Aphelenchoides, basophilia of 643
Aphanomyces cochlioides, in sugar beet 3
Aphanomyces euteiches
effect of oxygen tension on growth 492
in pea, effect of soil amendments on 131
in pea, tolerance to 800, **801**
aphid
Brevicoryne brassicae, transmits cabbage virus B 397
Myzus persicae, transmits bean yellow mosaic 67
transmits barley yellow dwarf virus 515, **517;** 578; 809
Apple, J. L. (195); 386
apple
indicator hosts for latent viruses 67
Spy 227-lethal and dwarf-fruit viruses 104, **105**
virus-caused decline in **67**
Aragaki, M. 803
Arisumi, T. 847
Ark, Peter A. 69
Armstrong, G. M. 642
Armstrong, J. K. (642)
Arny, D. C. (515); (768)
artichoke, curly dwarf virus 731, **732, 733, 734**
aryloxyalkanecarboxylic acids, toxic to Verticillium albo-atrum 128
Asai, G. N. (313)
Ascochyta, technique to maintain sporulation in isolates 797
Ascochyta chrysanthemi, causes and prevention of rapid spread 96
Ascochyta pisi, effect of radiation on sporulation 66
ascospore carriers of Pseudoplea trifolii to alfalfa 261
ascosporic inoculation with Pyrenophora bromi 587, **588**
Ashworth, L. J., Jr. 600
Aspergillus, distribution related to temperature 501, **502, 503**
Aspergillus glaucus, on shelled peanuts 244, **246, 248**
Aspergillus niger
colonizes organic matter in soil 625, **630**
effect of pH, phosphorylated compounds on germination 577
Aspergillus tamarii, on shelled peanuts 244, **246, 248**
Aspitarte, T. R. (66)
Athow, K. L. 341
autoradiograms, trace fungal infection in oak 210, **211, 212**
auxins, effect on virus-induced leaf abscission 195
Aycock, R. 107
8-azaguanine, controls stone fruit ringspot virus in cucumber 727, **729, 730**
Bachelder, S. (576)
bacterial wilt in tobacco, effect of reducing substances on resistance 491, **491**
Bagnall, R. H. 338
Bailey, A. G. 197
Baker, K. F. 96
banana
Cercospora leaf spot in, control 294
Fusarium wilt, resistance mechanisms 507, **509, 510, 512, 513;** 575
spray oil composition and disease control 317
spray oil phytotoxicity and disease control 528, **530**
spray oils to control Sigatoka disease 582, **583**
Barksdale, T. H. 313
barley
inoculation with Ustilago nuda 175
smut infection related to temperature 189, **190, 191**
barley yellow dwarf virus
aphid transmission 515, **517**
associated metabolic changes 768, **770, 771**
transmitted by corn leaf aphid 809
vectors specific to strains 578
Barnett, H. L. (616)
basophilia of soil and plant nematodes 643
Bateman, D. F. 445; 574
bean
new virus of 565, **567**
seed transmission of mosaic viruses 452
root-rot, from Fusarium chlamydospores in soil 308, **311**
Thielaviopsis basicola in rhizosphere 92, **93**
tobacco mosaic virus U1 and U2 in 68
Uromyces phaseoli in, colonization affected by temperature 486, **487;** 674, **676, 677, 678**
bean yellow mosaic virus
interacts with fungi in white clover 644
transmission by Myzus persicae 67
transmission to white clover 642

Beattie, Rolla Kent, biographical sketch 135
Beauveria bassiana, associated with Sitona larvae 640, **641**
Beckman, C. H. 507; 575; (576)
beet Western yellows virus, in sugar beet 605
Bell, A. A. (461)
Bennett, C. W. 546
Bermuda grass, spring dead spot controlled by chemical drenches 646
Berry, C. R. 642
Berry, R. W. 177
Berry, S. Z. 169
beta-propiolactone, controls strawberry latent A virus 66
bibliography of reviews, 1960 647
biographical sketches
Beattie, Rolla Kent 135
Cox, Carroll Eastburn 269
Güssow, Hans Theodore 739
Spaulding, Perley 209
Birchfield, W. (645)
black rot of crucifers, controlled by antibiotics 495, **498, 500**
Blattny, C. (183)
Bloom, J. R. (578)
Boehm, E. (531)
book listings 9; 16; 34; 168; 185; 188; 276; 285; 312; 342; 428; 451; 703
Boothroyd, C. W. (578)
Botrytis cinerea
effect of sulfur dioxide on 64
factors affecting spore germination 815, **816, 817, 818**
boxwood, Phytophthora parasitica in 734
Boyle, L. W. 117
Bradley, R. H. E. (397)
Brase, K. D. (457); (576)
Bretschneider, Brigitte F. (64)
Brevicoryne brassicae, transmits cabbage virus B 397
Bringhurst, R. S. 786
Broadhead, D. M. (643)
Brodie, B. B. 798
Bromfield, K. R. 590; 794
Bromomethane, controls ratoon stunting disease virus of sugarcane 645
Brown, D. H. (577)
brown spot needle blight, controlled by semicarbazone of cycloheximide 645
Bruehl, G. W. (227)
Brunnichia cirrhosa, Xanthomonas phaseoli in 206
Buer, L. (128)
Burke, D. W. (565)
Burton, C. L. 776
Butler, E. E. (67); 250; (572)
Buxton, E. W. 575
cabbage virus B, transmitted by Brevicoryne brassicae 397
cacao, Phytophthora palmivora in 161, **163**
Cadman, C. H. 29
Calavan, E. C. (262)
calcium, in resistance to Fusarium wilt of tomato 179
calcium pectate, in cell walls of virus-infected leaves 215
Calpouzos, L. (303); 317; 528; 582
Caltrider, P. G. 860
camellia, petal blight, spread by air-borne ascospores 69
Campana, R. J. 575
cantaloupe, laminal guttation of leaves 584, **585**
Cappellini, R. A. 575
captan, physiological side effects 576
carnation, synergistic Fusarium-nematode interaction in 143
carnation mosaic virus, hypersensitivity of Dianthus barbatus to 290
Carpenter, G. P. (68)
carrot, fungitoxic compound from roots 71
Carter, C. R. (644)
Carter, H. E. (321)
Carter, J. F. 204
casein hydrolysate, in nutrition of Xanthomonas vesicatoria 32
Cassia occidentalis, affected by tobacco ringspot virus, bioassay of 831
Castillo, B. S. (577)
Cation, D. 104
cauliflower mosaic virus, properties and serology 541, **542, 543, 544, 545**
Čech, M. 183
cell-wall composition of leaves, affected by virus infection 215
cell-wall dissolving enzymes, produced by Cladosporium cucumerinum 765
cellulase, produced by Cladosporium cucumerinum 765
cellulolytic enzymes, produced by Pythium aphanidermatum 270
Cephalosporium gramineum, in wheat 227, **228, 229, 231**
Cephalosporium gregatum, in soybean, reduces water flow in stem 863
Ceratocystis fagacearum, in oak 210, **211, 212**
Ceratocystis fimbriata
effects of temperature on 668, **669, 670, 671, 672**
insect transmission 576
pectolytic enzymes 277, **278, 281**
produces fungitoxic compound in carrot 71
Ceratocystis ulmi
culture 575
effect on seedling elms 847, **849, 850**
Cercospora insulana, in statice 129, **130**
Cercospora leaf spot, in banana, control 294
Cetas, R. C. 575; 575
Chamberlain, D. W. 863
Chant, S. R. 332
chemical drenches, control spring dead spot of Bermuda grass 646
chemotaxis, of Phytophthora parasitica zoospores 195, **196**
Chen, Tseh-an 799
Chenopodium amaranticolor, test plant for cowpea yellow mosaic virus 332, **332**
cherry
mild rusty mottle, rugose, and rasp leaf viruses, mechanical transmission 66
western X virus, controlled by roguing 488
Chessin, M. (195)
chestnut blight fungus, cultural variation 808
Chi, C. C. 704
Chilton, S. J. P. (645)
chlamydospores, of Fusarium in soil 308, **311**
chlamydospore germination, of Fusarium solani, effect of host contact on 620, **622**
chloropicrin, controls Verticillium wilt in strawberry 744, **745**
chlorotic leaf-spot virus, and decline of Spy-227 rootstock 457, **458, 459**; 576
Christou, T. (308)
chromatography, gas, to determine fumaric acid content 274, **276**
chrysanthemum, Ascochyta chrysanthemi in 96, **98**
Cimarron blight, in oats, genetic control 80, **81**
citrus
Cercospora citri-grisea in, causes greasy spot 297, **298, 299**
Cercospora gigantea in, causes tar spot 297, **298**
Citrus limetta and C. limettioides, indicators of exocortis 262, **263**
Cladosporium cucumerinum, produces cell-wall dissolving enzymes 765
Clitocybe tabescens, effect on peach 819
clover
bean yellow mosaic virus-fungus interaction 644
effect of nutrition on Fusarium root rot 704, **708, 709, 711**
Fusarium wilt in 642
transmission of bean yellow mosaic virus to 642
Cochliobolus, evolution of sexuality and pathogenicity 222

Cochliobolus carbonum, inheritance of pathogenicity 1, 1
coconut, internal spotting 577
coconut meat extract, inhibits tobacco mosaic virus 579
Cohen, S. I. (578)
Colberg, C. (317); (528); (582)
Coleman, O. H. (643)
colonization
by fungi, of organic matter in soil 625, **628, 630, 632**
by Uromyces phaseoli, effect of temperature on 674, **676, 677, 678**
Cook, A. A. 550
Cooper, G. R. 576
Cooper, W. E. 113
copper-8-hydroxyquinolate, inhibits spore germination 576
Corbett, M. K. (831)
Corden, M. E. 64; (179)
Cormack, M. W. 3; 260
corn
effect of quack grass on 576
Diplodia zeae in, factors affecting infection 376, **379**
Diplodia zeae in, pattern of infection 382, **383, 384**
Helminthosporium carbonum in, affected by nutrition 235, **237**
Piricularia grisea in, causes gray spot 197, **198**
root infection studies 578
corn leaf aphid, transmits barley yellow dwarf virus 809
corn stalk rot, comparative pathogenicity of fungi 578
Corynebacterium insidiosum, longevity in alfalfa hay, pod debris, and seed 260
Corynebacterium poinsettia, histological studies 642
Corynespora cassiicola, causes leaf spot of cotton 305, **307**; 643
Costa, A. S. (546)
cotton
boll rots of, distribution related to temperature 501, **502, 504**
Corynespora cassiicola leaf spot in 305, **307**; 643
leaf-crumple virus in 472, **474, 475, 476, 477**
Pythium in, damping-off controlled by 1,2-dibromo-3-chloropropane 798, **798**
root-knot damage in, histological studies 644
Couch, H. B. (578)
Couey, H. M. 64; 815
cowpea yellow mosaic virus, Chenopodium amaranticolor as test plant 332, **332**
Cox, Carroll Eastburn, biographical sketch 269
Craig, J. 376; 382
Cram, W. H. (35)
Creager, D. B. 642
Criconemoides, basophilia of 643
Criconemoides xenoplax, effect of host, soil temperature on 101, **102, 103**
Crispin Medina, A. 452
Critopoulos, P. D. 524
Cronartium fusiforme, spread in pine branch infections 646
Cronartium ribicola, in eastern white pine of different ages 429
Crone, L. J. 576
crown rust fungus, in North American oat varieties 303
crucifers, black rot controlled by antibiotics 495, **498, 500**
Cuban shaddock, indicator of exocortis 262, **263**
cucumber
cucumber mosaic virus concentration in 614
free amino acids in 776
seedlings, microorganisms on 553, **554**
stone fruit ringspot virus in 727, **729, 730**
cucumber mosaic virus
genetics of resistance 423,**425**
in Hibbertia volubilis 402, **403**
in resistant and susceptible varieties 614
synergism with Rhizoctonia 574
cucurbits
Erwinia tracheiphila in, isolation and inoculation 255, **256**
Fusarium solani in 17, **18, 19**
separation and identification of viruses in 802, **802**
Culbreth, W. (575)
cultural practices, in control of Sclerotium rolfsii 120, **123**
culture
of Ceratocystis ulmi 575
of Ditylenchus destructor 778, **779, 783**
of Endothia parasitica, variation in 808
curly dwarf virus of artichoke, host range and properties 731, **732, 733, 734**
Cylindrocarpon, in forest nurseries 35
Cylindrosporium sesami, growth in vitro and resistance of sesame to 89, **90, 91**
cytochrome oxidase, in tissues infected by obligate parasites 759, **760, 761**
Cytospora, in stone fruit varieties 152, **155**
Dahlia pinnata, host range and properties of viruses of 372, **373**
Daines, R. H. 576
Dale, J. L. (643)
Daly, J. M. 461; 759
damping-off etiology, in forest nurseries 35
Darling, H. M. (778)
Das, C. R. 64; 489
Davey, C. B. (92); 131; (693)
Davis, J. R. (65)
Davis, L. H. (96)
DBCP, controls Tylenchorhynchus claytoni 645
Dean, J. L. 643
Delfel, N. E. (317); (528); (582)
dessication, of Heterodera glycines 643
DeVay, J. E. (65); (66); (67); (274); (851)
deZeeuw, D. J. (776)
Dianthus barbatus, hypersensitivity to carnation mosaic virus 290
1,2-dibromo-3-chloropropane, controls Pythium ultimum 798, **798**
Dickey, R. S. 607
Dickson, J. G. (204); (224)
Dieffenbachia, bacterial stem and leaf rot 663, **664**
Diener, U. L. (244)
Dimock, A. W. (96)
Dimond, A. E. (179)
Dionne, L. A. (264)
Diplodia zeae
in corn, factors affecting infection 376, **379**
in corn, pattern of infection 382, **383, 384**
Diporotheca rhizophila, host range, spore germination, and pathogenicity 718, **720**
Ditylenchus destructor, histology, hosts, and culture 778, **779, 783**
dodine, controls Xanthomonas pruni 576
Dolliver, J. S. 364
Downs, R. J. (356)
Drolsom, P. N. (587)
Drosophila melanogaster, transmits Geotrichum rot of tomato 250, **252**
Dukes, P. D. 195
Duffus, J. E. 605
Duran, R. (67)
dwarf-fruit virus 104, **105**
dwarf fascicle abnormality, of short leaf pine 646
Dyson, Joan G. 195
Eckert, J. W. 64; 64
Edgington, L. V. 179
Eggert, D. A. 576
Eide, C. J. (286)
electron microscopy
of peach yellow bud mosaic virus 198, **199**
of spruce virus 183, **184**
of cauliflower mosaic virus **542**
Ellingboe, A. H. 13
elm
seedlings affected by Dutch elm disease 847, **849, 850**

Endo, B. Y. 643
Endo, R. M. 402
Endothia parasitica, cultural variation 808
English, H. 65
enzymes
produced by Cladosporium cucumerinum 765
produced by Pythium aphanidermatum 270
Erwin, D. C. 472
Erwinia chrysanthemi, strain of, affects philodendron 826, 828
Erwinia dieffenbachiae, new pathogen of Dieffenbachia 663, **664**
Erwinia tracheiphila, in cucurbits, techniques 255, **256**
Esposito, R. G. (575); 576
exocortis, indicator plants for 262, **263**
Faulkner, L. R. 778
Feder, W. A. 724
Feldmesser, J. (724)
Felix, E. L. (645)
Figaro, Peggybeth (334)
filipin, mechanisms of inhibition of fungi 321, **323, 324, 327**
fire blight, affected by tree nutrition 557
Fischer, W. R. (334)
Fisher, E. G. (557)
Fisher, F. E. 297
forage plants, Leptosphaerulina in 680, **683**
Forbes, I. L. (634)
Ford, R. E. 576
Foster, R. J. (227)
Fulton, J. P. (643)
fumaric acid
determined by gas chromatography 274, **276**
in hull rot disease of almond 851, **852, 854, 856, 857**
fungi
antagonisms to nematode-trapping fungi 66
colonize organic matter in soil 625, **628, 630, 632**
effect of radiation on sporulation 65
inhibition by filipin 321, **323, 324, 327**
fungicides
control Cercospora leaf spot of banana 294
control damping-off of spinach 575; 575
effect on larval emergence of tobacco cyst nematode 577
effect on soil mycoflora 64
movement through soil columns 593, **595, 596, 597, 598**
preplanting treatments 644
Sclerotinia adapt to 399
fungicide-oil-water emulsions, control Cercospora leaf spot of banana 294
fungicide solution, penetration of soil 593, **595, 596, 597, 598**
fungicide suspension, penetration of soil 593, **595, 597, 598**
fungitoxic compound, from carrot roots 71
Furumoto, W. 65
Fusarium
affected by nutrition of red clover 704, **708, 709, 711**
associated with Sitona larvae 640
clovers susceptible to 642
in banana, resistance 507, **509, 510, 512, 513**; 575
in carnation, synergistic interaction with nematodes 143
in forest nurseries 35
in grapefruit, interacts with Radopholus similis 724, **725**
in sugar beet 3
in tomato, effect of pectic substances on resistance 179
isolation by culture filtrate media 164, **166, 167**
new nematocides for 643
technique to study relative soil populations 805, **806**
Fusarium oxysporum
effect of fungicides on 64
in alfalfa 643
interacts with bean yellow mosaic virus 644
production of lycomarasmin 578
serological separation of physiologic races 575
test for enzyme activity in 337, **338**
Fusarium roseum, interacts with bean yellow mosaic virus 644
Fusarium solani
chlamydospore germination and host contact 620, **622**
chlamydospores in soil 308, **311**
comparative pathogenicity of races 17, **18, 19**
effect of host exudates on germination 389, **390, 391**
in swamp tupelo 646
Futrell, M. C. (177)
gardenia, Helicotylenchus nannus in 65
Garren, K. H. 120
gas chromatography, determines fumaric acid content 274, **276**
Gaudy, Elizabeth (321)
geminate buds, effect of peach mosaic virus on 67
genetics
evidence of gene pools for pathogenicity 736
of Cochliobolus, evolution of sexuality and pathogenicity 222
of Cochliobolus carbonum, inheritance of pathogenicity 1, 1
of Gibberella fujikuroi, mutants produced by irradiation 336, **336**
of leaf blight in Cimarron oats 80
of resistance to cucumber mosaic virus 423, **425**
of resistance to potato virus Y in pepper mutant 550
of resistance to Pseudomonas tabaci 174
of resistance to viruses in tobacco 577
of Sphacelotheca reiliana, heritable albinism in 407
recombinants in Puccinia graminis 13
Geotrichum candidum, in tomato, transmitted by Drosophila melanogaster 250, **252**
germination
of Sphaerotheca pannosa, environmental requirements 699
of uredospores 579
of Fusarium solani, affected by host exudates 389, **390, 391**
Gibberella fujikuroi, effects of alpha irradiation on 336, **336**
gibberellic acid, effect on Rhizoctonia solani 67
Gibson, I. A. S. 531
Gilbertella persicaria
effect of temperature on 572, **572, 573**
in peach rot 67
Gilmer, R. M. 457; 576
gladiolus
Penicillium funiculosum in 643
Stromatinia gladioli in, resistance affected by previous nutrition 482, **484**
Gold, A. H. 561
Good, J. M. 643; (645)
Gordon, C. C. 718
Goth, R. W. 132
Gottlieb, D. 321
Gould, C. J. 482
grafting, technique for increasing hypersensitivity to viruses 290, **292**
Graham, J. H. 680
Graham, K. M. 264
grape
Criconemoides xenoplax in 101, **102**
Guignardia bidwellii on 860, **861, 862**
Melanconium fuligineum in 524, **525, 526**
Tylenchulus semipenetrans in 67
grapefruit, interaction of Radopholus similis and Fusarium in 724, **725**
greasy spot of citrus, caused by Cercospora citri-grisea 297, 298, 299
Gregory, G. F. 577
Griffin, G. D. (806)
Grogan, R. G. (452); (837)
Grover, R. K. 399
Guignardia bidwellii, on grape 860, **861, 862**
Güssow, Hans Theodor, biographical sketch 739
Guthrie, J. W. (84)

Haasis, F. A. 734
Hadden, S. J. (490)
Hagedorn, D. J. (492); (805)
Haglund, W. A. 800
Hale, M. G. 235
Halisky, P. M. 65; 407; 501
Halmos, S. (507); (575)
Halpin, J. E. (642); (644)
Hamblen, M. L. (350)
Hanson, E. W. (704)
Harrison, A. L. 124
Hart, Helen (75)
heat inactivation, of TMV-infected centers, kinetics 823, **824, 825**
Helicotylenchus, in carnation, interaction with Fusarium 143
Helicotylenchus nannus, in gardenia 65
Helminthosporium, evidence for gene pools in 736
Helminthosporium carbonum, in corn, relation of nutrition 235, **237**
Helminthosporium victoriae
effect of media on toxin production 177
morphology and respiration 644
Helton, A. W. 152; 488
Hemicycliophora arenaria, biology and pathogenicity 393, **395, 396**
Hendrix, J. W. 194; 643
herbicides, preplanting treatments 644
Herridge, E. Anne 65
Heterodera glycines
dessication studies 643
factors affecting larval emergence 350, **352**
Heterodera schachtii
attraction to host plant roots 136, **137, 140, 141**
cyst hatching, effect of storage environment on 623, **624, 625**
cyst hatching, technique 330, **330, 331**
Hibbertia volubilis, effect of cucumber mosaic virus on 402, **403**
Higgins, D. J. (847)
Hilborn, M. T. (576)
Hildebrand, E. M. 419; 833
Hill, A. C. 356
Hine, R. B. 10
histology
of bacterial blight of poinsettia 642
of Ditylenchus destructor 778, **779, 783**
histopathology, of root-knot resistant and susceptible cotton 644
Hodgson, W. A. (264)
Hollis, J. P. 643; (645)
holly, histological differentiation to damage to 65
Holmes, F. O. 577
Holmes, F. W. 712
Hood, J. R. (164)
Hooker, A. L. (376); (382)
hop downy mildew, overwintering 241
hops, Pseudoperonospora humuli in 241, **242**
Horner, C. E. (66)
Horton, J. C. 434
hosts
of Diporotheca rhizophila 718
of Ditylenchus destructor 778, **779, 783**
of Pratylenchus brachyurus and P. zeae 644
of soil-transmitted tobacco ringspot virus 194
host exudates, effect on Fusarium solani germination 389, **390, 391**
host-parasite relations
effect of host contact on Fusarium solani chlamydospore germination 620, **622**
effect of host exudates on Fusarium solani chlamydospore germination 389, **390, 391**
Helminthosporium carbonum and nutrition in corn 235, **237**
tobacco black shank and host nutrition 386, **388**
host range
of curly dwarf virus of artichoke 731
of Dahlia pinnata viruses 372
of Sclerotium rolfsii 108
of tobacco ringspot virus in Nicotiana 833
Houston, B. R. (67)
Hsi, C. H. 340
hull rot disease of almond
pathogen roles in 843, **844, 846**
role of fumaric acid in 851, **852, 854, 856, 857**
hypersensitivity, in Pinto bean 486
Ikenberry, G. J., Jr. 80
immunity, tests for potato immunity to virus X 338
indole acetic acid, effect on virus-induced leaf abscission 195
inoculation
effect of technique on resistance of mint to Verticillium albo-atrum 169, **172**
of longleaf pine with Scirrhia acicola 186
of seedlings with Ustilago 175
with virus by means of pipecleaner 808
insect transmission, of Ceratocystis fimbriata 576
internal cork virus, transmission by aphid vs. manual methods 419, **421**
Ivanoff, S. S. 584
Jackson, C. R. 129; 643
Jenkins, J. H. 643
Jensen, H. J. (65)
Jensen, S. G. (759)
John, C. A. (255)
Johns, D. M. (644)
Jones, J. P. 206; 305; 643
Jones, Karla B. (64)
Joyner, J. F. (645)
Kaufmann, M. J. 587
Kavanagh, T. 175; 189
Keane, F. W. L. (67)
Kehr, A. E. (833)
Kelman, A. 158; (491)
Kemp, W. G. (290)
kenaf, selection of root-knot resistant varieties 645
Kendrick, E. L. 537
KenKnight, G. 345
Kilpatrick, R. A. 640; (799)
Kimble, K. A. (837)
kinetics, of heat inactivation of infected centers 823, **824, 825**
King, T. H. (800)
Kirkpatrick, H. C. (15); 727
Klein, H. H. 294
Klisiewicz, J. M. 495
Klotz, L. J. (64)
Knutson, K. W. 286
Kolbezen, M. J. (64)
Kondo, W. T. 407
Konicek, D. E. 65; (152)
Králik, O. (183)
Kreitlow, K. W. 808
Krog, N. E. 75
Krupka, L. R. (461)
lactophenol, staining Ustilago nuda in barley 27, **27, 28**
laminal guttation, of cantaloupe leaves 584, **585**
Langley, B. C. (600)
Larson, R. H. (806)
larvae, of Sitona, fungi associated with 640
Laviolette, F. A. (341)

Leach, C. M. 65; 66
leaf-crumple virus, symptomatology in cotton 472, **474, 475, 476, 477**
leaf roll, in tomato, caused by potato leaf-roll virus 578
leaf spot of cotton, caused by Corynespora cassiicola 305, **307**
Lear, B. (520)
Leathers, C. R. 410
Leben, C. 553
Ledger, M. (531)
Leptosphaerulina, in forage plants 680, **683**
Le Tourneau, D. J. (84); (75); 128
letters to the editor
A possible history of sour cherry yellows, R. M. Gilmer 265
On "facultative heteroecism," R. S. Peterson 266
Lewis, G. D. 577
light, effect on development of Puccinia sorghi 224, **225**
Lilleland, O. (65)
Lindberg, G. D. (643); (644)
Lindner, R. C. 15; (727)
Linsey, N. (533)
Lister, R. M. (29)
Liu, S. C. Y. 413
loblolly pine, Scirrhia acicola in 186
Loebenstein, G. 533
longleaf pine, artificial inoculation with Scirrhia acicola 186
Lownsbery, B. F. 101; 219
Luepschen, N. S. (557)
Luke, H. H. 490
Lukens, R. J. 577
Luttrell, E. S. (680)
lycomarasmin, physiology 578
Lyda, S. D. (67); (572)
lyophil preservation
of Pythium 259
of Ustilago avenae teliospores, effect of storage temperature 407
Mace, M. E. (507); (575)
Macrophomina phaseoli, resistance in sorghum 340
Maine, E. C. 491
manganese, in oak, related to stem cankers 579, **580**
Mankau, R. 66
maple, effect of salt on 712, **715**
Maramorosch, K. 577
Martin, J. P. (146)
Matherly, Enid P. (642)
McBride, J. M. 644
McCain, A. H. 66
McCarter, S. M. 644
McCombs, C. L. (270); 644
McCrum, R. C. (576)
McDonald, W. C. 261
McFadden, Lorne A. 663; (826)
McGahan, M. W. (507)
McLean, J. G. 84
McVey, D. V. (303)
Medler, J. T. (515)
Melanconium fuligineum, in grape 524, **525, 526**
Melching, J. S. (577)
Meloidogyne
effect of soil temperature on reproduction 520, **521, 522, 523**
in carnation, interaction with Fusarium 143
Meloidogyne hapla
attraction to host plant roots 136, **137, 138, 139, 140, 141**
in tomato, attraction to germinating seeds 219, **220**
Meloidogyne incognita acrita
attraction to host plant roots 136, **137, 138**
histological studies 644
Meloidogyne incognita incognita, new nematocides for 643
Menzies, J. D. (718)
metabolic alterations of Ceratocystis fimbriata, induced by temperature 668, **670, 671, 672**
metabolism, effect of barley yellow dwarf virus on 768, **770, 771**
metabolite of Cephalosporium gregatum, affects soybean 863
Meyer, R. (472)
Milbrath, J. A. (64); (67); (489)
Mildner, R. A. 372
Miller, H. N. 826
Miller, P. M. 577
Miller, P. W. 66
Miller, R. E. 578
mint, Verticillium albo-atrum in 169, **171, 172**
Minton, N. A. 644
Mirocha, C. J. 66; 274; 843; 851
Mitchell, J. E. (440)
Moffatt, J. E. (3)
moisture
effect of humidity on sulfur dioxide toxicity 64
effect on Verticillium albo-atrum 66
in decay of sugar beet 3
of soil, effect on Agrobacterium tumefaciens populations 607, **611**
of soil, effect on fungicide movement 593, **595, 596, 597, 598**
of soil, effect on poinsettia root rots 445, **447, 448, 450**
of soil, effect on Pythium blight of bentgrass 578
optimum for germination of Sphaerotheca pannosa 699
Monilinia, in hull rot disease of almond 843, **844; 851**
Moore, E. L. (201)
Moore, J. D. (399)
Moore, L. D. 578
Morgan, G. A. (35)
morning glory, indicator plant for tobacco ringspot virus 833, **834**
morphology of healthy and diseased Helminthosporium victoriae 644
Mortierella pusilla, Piptocephalis virginiana in 616, **618**
Morton, D. J. 27; 731
Murakishi, H. H. 412
Murphy, H. C. (303)
mutants
caused by semisynthetic medium 210
in pepper, resistant to potato virus Y 550
mycoparasitism 616, **618**
Mycosphaerella aleuritidis, in tung, ascigerous stage 646
Munnecke, D. C. 593
nabam, controls wilt disease of golf greens 577
Nadakavukaren, M. J. 66
napthalene acetic acid
effect on virus-induced leaf abscission 195
effect on resistance to Fusarium wilt of tomato 179
Nash, Shirley M. 308
Natti, J. J. 578
Nayudu, M. V. 32; 368
needle blights of white pine 642
Nelson, R. R. 1; 222; 736
nematocides
new, control root-knot nematodes 643
preplanting treatments 644
nematodes
antagonisms to nematode-trapping fungi 66
basophilia of 643
new species, varieties, strains, diseases, etc.
disease of swamp tupelo, caused by Fusarium solani 646
Erwinia dieffenbachia 663, **664**
of Leptosphaerulina 680, **683**
sugarcane mosaic virus, new strain 642
western bean mosaic virus 565, **567**
Nicholas, H. K. (64)
Nicotiana
host range of tobacco ringspot virus in 833
hypersensitivity to tobacco mosaic virus 290, **292**

Nicotiana glutinosa, kinetics of heat inactivation of TMV 823, **824, 825**
Nielsen, E. L. (587)
Nigrospora oryzae, distribution related to temperature 501, **502, 504**
nitrogen
effect on Aphanomyces root rot of pea 131
excess, predisposes tobacco to black shank 386, **388**
increases fire blight susceptibility 557
sources affect toxin production of Helminthosporium victoriae 177
nitrogenous fertilizers, control Sclerotium rolfsii 124
nutrition
effects on fire blight development 557
effects on mycoparasitism 616, **618**
effects on Pythium blight of bentgrass 578
effects on red clover root rots 704, **708, 709, 711**
effects on red clover tissue maturation 704, **706, 707, 708, 709, 711**
of Helminthosporium carbonum in corn 235, **237**
of Xanthomonas vesicatoria 32
previous, and effect of Stromatinia gladioli in gladiolus 482, **484**
requirements of Sclerotium rolfsii 110
Nyland, G. 66
oak
Ceratocystis fagacearum in 210, **211, 212**
effect of salt on 712, **714**
oats
attraction of parasitic nematodes to roots 136, **137, 140, 141**
genetic control of Cimarron blight 80, **81**
Puccinia coronata in 202
resistance to Puccinia coronata 303
smut races, A14-B 490
smut races, in South Atlantic states 490
obligate parasites, infection associated with cytochrome oxidase 759, **760, 761**
Ogawa, J. M. (66); 67; 572
orange
Penicillium decay control 64
Tylenchulus semipenetrans in 146, **149, 151**
Orellana, R. G. 89
organic matter in soil, colonized by fungi 625, **628, 630, 632**
Orlob, G. B. 397; 515; 768
oxalic acid, effect on parasitism by Sclerotium rolfsii 110
oxygen tension, effect on growth of Aphanomyces euteiches 492
ozone
in tobacco fleck disease 579
toxic to plants 356, **358, 359, 362**
Pack, M. R. (356)
Page, O. T. 337; 578
Panagrellus redivivus, plant sap toxic to 579
Papavizas, G. C. 92; (131); 693
Parker, K. G. 557
Parmeter, J. R., Jr. 164
pathogenicity
comparative, of fungi in corn stalk rot 578
of Diporotheca rhizophila 718, **720**
of Helminthosporium, evidence of gene pools for 736
of Hemicycliophora arenaria 393, **395, 396**
of Pythium, potential 505
Patton, R. F. 429
Pavgi, M. S. 224
pea
Aphanomyces euteiches in 131
Aphanomyces euteiches in, tolerance to 800, **801**
peach
affected by Clitocybe tabescens 819
amygdalin breakdown in replanting 10, 11
bacterial canker control 65
Criconemoides xenoplax in 101, **102, 103**
Cytospora in 152, **155**
peach-mosaic virus, causes geminate bud production 67
Gilbertella persicaria in 67
powdery mildew 478, **479, 481**
Sphaerotheca pannosa in 699
western X virus, controlled by roguing 488
peach orchards, spread of phony disease in 345, **346**
peach yellow bud mosaic virus
purification and electron microscopy 198, **199**
relation to tomato ringspot virus 29
peanut
effect of storage fungi on 244, **246, 248**
indicator for Pseudomonas solanacearum 158, **160**
Sclerotium rolfsii in 113; 120, **123**
Sclerotium rolfsii and Rhizoctonia solani, comparative pathogenicity 600, **601, 603**
Verticillium albo-atrum resistance 411, **411**
pectic acid, in cell walls of virus-infected leaves 215, **217**
pectic substances, in resistance to Fusarium wilt of tomato 179
pectin methylesterase, produced by Cladosporium cucumerinum 765
pectinolytic enzymes
produced by Pythium aphanidermatum 270
effect on Cephalosporium gramineum in wheat 227, **228, 229, 231**
pectolytic enzymes, of Ceratocystis fimbriata 277, **278, 281**
Penicillium
colonizes organic matter in soil 625, **628**
effect of fungicides on 64
Penicillium citrinum, effect on shelled peanuts 244, **246, 248**
Penicillium digitatum, control by aliphatic amines 64
Penicillium frequentans, Piptocephalis xenophila in 616
Penicillium funiculosum, causes gladiolus corm and root rot 643
pentachloronitrobenzene
controls Sclerotium rolfsii 124
increases damping-off due to Pythium 531
reduces damping-off due to Rhizoctonia solani 531
pepper mutant resistant to potato virus Y 550
permeability changes, caused by victorin 646
peroxidase activity, effect on veinclearing virus of sweet potato 533, **535, 536**
Person, L. H. (158); 797
Petersen, D. H. 819
Petersen, L. J. (65); 67
Peterson, J. L. 578
Pfahler, P. L. (490)
pH
effect on Agrobacterium tumefaciens populations 607
effect on development of Puccinia sorghi 224
effect on germination of Aspergillus niger 577
effect on Pythium blight of bentgrass 578
phenols
effect on Verticillium albo-atrum 84; 128
in potato 84, **86**
philodendron, bacterial disease of 826, **828**
Phoma betae, in sugar beet 3
phony disease, spread of, in peach orchards 345, **346**
phosphorus, increases fire blight susceptibility 557
phosphorylated compounds, effect on germination of Aspergillus niger 577
photoperiod response, to select root-knot resistant kenaf 645
Phytophthora, isolation by antibiotics 64
Phytophthora cactorum, in forest nurseries 35
Phytophthora infestans
mutability on blight-resistant hosts 264
parasitic aggressiveness in 286, **287, 289**
relative survival ability of races 748, **753**

Phytophthora megasperma, causes seed-piece rot of sugarcane 634, **636, 637**
Phytophthora palmivora, complementary isolates from cacao and rubber 161, **163**
Phytophthora parasitica
chemotaxis of zoospores 195, **196**
effect of host nutrition on development 386, **388**
in boxwood 734
phytotoxicity, banana, related to spray oils 528, **530;** 582, **583**
Pine, T. S. 67
pine, spread of Cronartium fusiforme in 646
Piptocephalis virginiana, effect of host nutrients on 616, 618
Piptocephalis xenophila, effect of host nutrients on 616
Piricularia grisea, in corn 197, **198**
Piricularia oryzae, spore release 313, **314, 316**
Pirone, T. P. (434); 541
pith density, effect on Diplodia zeae infection in corn 376, **379**
Plakidas, A. G. (69)
plant dry weight, effect on population levels of Pratylenchus penetrans 364, **365, 366, 367**
plum, Cytospora in 152; **155**
pod mottle virus, serological studies 755, **757**
poinsettia
effect of soil moisture on root rots 445, **448, 450**
histological studies of bacterial blight 642
pollination transmits stone fruit ringspot virus in squash 489
polygalacturonase
in Fusarium cultures 337
produced by Cladosporium cucumerinum 765
polysaccharide, effect on Cephalosporium gramineum in wheat 227
Porter, F. M. (303)
postplanting application of DBCP, controls Tylenchorhynchus claytoni 645
potato
chemical treatment of seed-piece 645
leaf-roll virus, in tomato 578
mutation of Phytophthora infestans in blight-resistant potato 264
tests for immunity to potato virus X 338
potato corky ringspot virus, Trichodorus christiei as vector 806, **807**
potato virus X
effect of temperature on interaction with potato virus Y 576
in red clover 132
interacts with potato virus Y 5, 7; 740, **742**
recovery from immune plants 338
potato virus Y, mutant in pepper resistant to 550
Pound, G. S. (434); (495); (541)
Powell, N. T. 201
Pratylenchus brachyurus, P. zeae, corn and weeds as relative hosts 644
Pratylenchus penetrans, effect of plant dry weight on population level 364, **365, 366, 367**
Prend, J. 255
prune, Cytospora in 152
Prunus ringspot virus
transmission in Buttercup squash 64
transmitted by foliage contact in squash 68
Psarros, E. E. 644
Pseudomonas solanacearum
pathogenic variation in isolates from tomato 158, **159**
in tobacco, reducing substances and resistance 491, **491**
Pseudomonas syringae, in peaches, soil treatments for control 65
Pseudomonas tabaci, genetics of resistance in tobacco 174
Pseudoperonospora humuli, overwinters in hops 241, **242**
Pseudoplea trifolii, inoculation of alfalfa by ascospore carriers 261
Puccinia carthami, control by exposure to steam 66
Puccinia coronata
control by acrolein phenylhydrazone 77, **78**
effect of temperature on reaction type 202
in oats in North America 303
Puccinia graminis
effect of temperature on 590, **591**
effect of rehydration on uredospore viability 410, **410**
effect on sugar content of infected wheat leaves 75
recombinants in 13
respiratory changes caused by 461, **464, 466**
Puccinia recondita, controlled by acrolein phenylhydrazone 77, **78**
Puccinia sorghi, effect of environmental factors on development 224, **225**
purification
of peach yellow bud mosaic virus 198
of plant viruses by serological means 561
Pyrenophora bromi
inoculation with 587, **588**
sporulation in culture 204, **205**
2-pyridinethiol-1-oxide derivatives, root absorption of 578
Pythium
damping-off increased by pentachloronitrobenzene 531
in sugar beet 3
isolation and determination of soil populations 440
lyophil preservation 259
potential pathogenicity 505
Pythium aphanidermatum, produces cellulolytic and pectinolytic enzymes 270
Pythium debaryanum, in forest nurseries 35
Pythium ultimum
controlled by 1,2-dibromo-3-chloropropane 798, **798**
effect of pH, soil temperature and moisture, and nutrition on 578
in forest nurseries 35
in highland bentgrass 578
in poinsettia, effect of soil moisture on 445, **450**
quack grass, effect on tomato and corn 576
races of Phytophthora infestans, relative survival 748, **753**
race groups of Tilletia 537
Rackham, R. L. (393)
radiation
alpha irradiation, effects on Gibberella fujikuroi 336, **336**
effect on fungus sporulation 65
effect on sporulation of Alternaria tomato 803, **804**
effect on sporulation of Ascochyta pisi 66
radish black spot, etiology of 645
radish mosaic viruses, identity 434, **436, 438, 439**
radish yellows virus, in sugar beet 605
Radopholus similis, in grapefruit, interacts with Fusarium 724, **725**
Ragetli, H. W. J. (215); (290)
Rankin, H. W. 644
Rappaport, I. (68); (823)
raspberries, reduction of postharvest decay 575
ratoon stunting disease virus of sugarcane, controlled by Bromomethane 645
recombinants in Puccinia graminis 13
red clover, potato virus X in 132
red node virus, serological studies 755, **757**
red oak, Ceratocystis fagacearum in 210, **211, 212**
reducing substances, in tobacco, effect on resistance to bacterial wilt 491, **491**
Reed, H. E. 645
rehydration, effect on viability of Puccinia graminis 410, **410**

resistance
of oats to Puccinia coronata 303
of strawberries to Verticillium wilt 786, **788**, **789**, **790**, **791**, **792**, **793**
physical barriers to Fusarium in bananas 507, **509**, **510**, **512**, **513**
to Ceratocystis fimbriata, effect of temperature on 668, **670**, **671**, **672**
to cucumber mosaic virus, genetics of 423, **425**
to cucumber mosaic virus, mechanisms of 614
to Sclerotium rolfsii 113
to viruses, inheritance of in tobacco 577
respiration
changes of, during development of rust diseases 461, **464**, **466**
in rust diseases, effect of oxidase inhibitors on 759, **760**, **761**
of healthy and diseased Helminthosporium victoriae 644
Reynolds, J. E. 67
Rhabditis, basophilia of 643
Rheum rhaponticum root necrosis, dissemination, effect, and control 412
Rhizobium, effect on red clover root rots 704, **708**, **709**, **711**
Rhizoctonia
control in wilt disease of golf greens 577
saprophytic activity in soil 693, **695**
synergism with cucumber mosaic virus 574
Rhizoctonia solani
effect of gibberellic acid on 67
in forest nurseries 35
in poinsettia, effect of soil moisture on 445, **450**
in sugar beet 3
interacts with bean yellow mosiac virus 644
pathogenicity compared with Sclerotium rolfsii 600, **601**, **603**
Rhizopus
fumaric acid content determined by gas chromatography 274, **276**
in hull rot disease of almond 843, **844**; 851, **852**, **855**, **857**, **858**
Rhizopus nigricans
colonizes organic matter in soil 625, **630**
distribution related to temperature 501, **502**, **503**
Rhopalosiphum maidis, transmits barley yellow dwarf virus 809
rice, local infection of florets by Tilletia horrida 130
Rich, A. E. (576); (579); (799)
Rich, S. (579)
Ristich, S. S. 578
Roane, C. W. (235)
Roberts, D. A. 831
Rochow, W. F. 578; 809
rod-shaped particles, associated with virosis of spruce 183, **184**, **185**
roguing, controls western X virus in peach and cherry orchards 488
root absorption, of derivatives of 2-pyridinethiol-1-oxide 578
root-knot nematodes
controlled by new nematocides 643
leaf-inoculation technique 201
selection of kenaf resistant to 645
Rosinski, M. A. (575)
Ross, A. F. (5); (576); (740)
Ross, E. W. 579
Rothkirch, H. (577)

smut infection, in barley and wheat, effect of temperature on 189, **190, 191**
Snow, G. A. 186; 645
Snyder, W. C. (17); (308); (389); (620)
sodium, effect on Aphanomyces root rot of pea 131
Sohi, S. S. (67)
soil
amygdalin breakdown in peach replant problem 10, **11**
detection of Agrobacterium rhizogenes in 69, **70**
soil-borne viruses, relation of tomato ringspot and peach yellow bud mosaic viruses 29
soil amendments, treat Aphanomyces euteiches 131
soil fungicides, control damping-off of spinach 575; 575
soil sterilization, effect on Agrobacterium tumefaciens populations 607, 609, 610, **612**
soil transmission, of tobacco ringspot virus 194; 643
soil treatments, control bacterial canker in peach 65
soil treatments, effect on fungicide movement 593, **595, 596, 597, 598**
soil type and effect of Tylenchulus semipenetrans on orange 146, **149, 151**
soil type and effect on fungicide movement 593, **595, 596, 597, 598**
Sondheimer, Ernest 71
sorghum
screened for charcoal rot resistance 340
susceptibility to Sphacelotheca reiliana 65
sowbane mosaic virus, seed transmission of 516, **549**
soybeans
Cephalosporium gregatum in, reduces water flow 863
premature dying of 646
seed transmission of tobacco ringspot virus in 341
Spalding, D. H. 227
Spaulding, Perley, biographical sketch 209
Sphacelotheca reiliana
heritable albinism in 407, **408**
in sorghum 65
Sphaerotheca pannosa
orchard development 478, **479, 481**
requirements for germination 699
spinach, control of damping-off in 575; 575
spores, air-borne in spread of Sclerotinia camelliae 69
spore germination
inhibited by copper-8-hydroxyquinolate 576
of Aspergillus niger, factors affecting 577
of Botrytis cinerea, affected by SO_2 815, **816, 817, 818**
of Diporotheca rhizophila 718, **720**
spore release, of Piricularia oryzae 313, **314, 316**
sporulation
of Ascochyta, technique 797
of Ascochyta pisi, effect of radiation on 66
of fungi, effect of radiation on 65
of Pyrenophora bromi in culture 204, **205**
of Uromyces phaseoli, rate of 22, **24, 25**
Sprague, R. 334
spray oils
control Cercospora leaf spot in banana 294
control Sigatoka disease 582, **583**
composition of, effect on disease control in banana 317
on banana 528, **530**
spring dead spot of Bermuda grass, control by chemical drenches 646
spruce, rod-shaped particles associated with virosis 183, **184, 185**
Spy-227 lethal virus 104, **105**
Spy-227 rootstock, effect of chlorotic leaf-spot virus on 457, **458, 459**; 576
squash
Prunus ringspot virus in 64; 68
stone fruit ringspot virus transmitted by pollination 489
Staffeldt, E. E. 259
Stahmann, M. A. (277)
stains, list of certified 51
Stall, R. E. (568)
Staples, R. C. (579)
statice, Cercospora insulana in 129, **130**
Steib, R. J. 645
stem cankers in oak, related to manganese 579, **580**
sterile culture techniques, in plant nematology research 799, **799, 800**
Stessel, G. J. 579
Stewart, R. N. (143)
Stoddard, E. M. (577); (577)
Stokes, G. W. (174)
stone fruit ringspot virus
in cucumber, controlled by 8-azaguanine 727, **729, 730**
in squash, transmitted by pollination 489
storage environment
effect on hatching of Heterodera schachtii cysts 623, **624, 625**
of sugar beet, effect of temperature, wilting, and moisture 3
Storkan, R. C. (744)
Stouffer, R. F. 5; 740
strawberry
breeding for Verticillium wilt resistance 786, **788, 789, 790, 791, 792, 793**
Verticillium wilt, controlled by chloropicrin 744, **745**
strawberry virus
late symptom expression 645
latent A virus controlled by beta-propiolactone 66
streptomycin, variable effect on Xanthomonas vesicatoria 568, **570**
Stretch, A. W. (575)
Strider, D. L. 765
Stromatinia gladioli, effect on gladiolus related to previous nutrition 482, **484**
Sudia, T. W. 336
sugarcane
mechanical vs. natural infection with mosaic virus 643
Phytophthora megasperma in 634, **636, 637**
ratoon stunting disease virus in, controlled by Bromomethane 645
seed-piece rot 634, **636, 637**
sugarcane mosaic virus
mechanical vs. natural infection 643
new strain 642
sugar beet
beet Western yellows virus in 605
storage 3
sugar content
effect on Diplodia zeae infection in corn 376, **379**
of anthracnose-infected watermelon 644
of wheat infected with Puccinia graminis 75
sulfur dioxide
effect on Botrytis cinerea 64
factors affecting toxicity to Botrytis cinerea spores 815 **816, 817, 818**
reduces postharvest decay of raspberries 575
Summers, T. E. 645
swamp tupelo, new disease of 646
sweet potato
cork virus transmission by aphid vs. manual methods 419, **421**
effects of veinclearing virus on 533, **535, 536**
tobacco ringspot virus in 833, **834**

Swenson, K. G. (64); 67, 68
Syamananda, R. 579
symptom expression
in cotton leaf-crumple virus 472, **474, 475, 476, 477**
late, in strawberry virus 645
synergism between cucumber mosaic virus and Rhizoctonia 574
Tachibana, H. 67
tar spot of citrus, caused by Cercospora gigantea 297, **298**
Taylor, G. S. (577), 579
Taylor, R. H. 837
techniques
autoradiograms to trace fungal infection in oak 210, **211, 212**
detection of virus from dehydrated leaf tissue 200
detection of virus from single seeds 200, **201**
for culture of Ceratocystis ulmi 575
for germination of uredospores 579
for hatching tests of Heterodera schachtii 330, **330, 331**
for selective isolation of Pythium from soil 440
gas chromatography to determine fumaric acid content 274
mechanical vs. natural infection of sugarcane with mosaic virus 643
paper chromatography for assay of polygalacturonase activity in fungi 337, **338**
pipecleaner as tool for virus inoculation 808
serological purification of plant virus 561
sterile culture, in plant nematology 799, **799, 800**
to determine tolerance of pea to Aphanomyces euteiches 800, **801**
to incite disease with Pyrenophora bromi 587
to increase hypersensitivity to viruses 290, **292**
to inoculate leaves with root-knot nematodes 201
to inoculate seedlings with Ustilago 175
to isolate and inoculate Erwinia tracheiphila in cucurbits 255, **256**
to maintain sporulation in isolates of Ascochyta 797
to protect seedlings from air-borne microflora 553, **554**
to screen for charcoal rot resistance in sorghum 340
to separate and identify viruses of cucurbits 802
to study relative soil populations of Fusarium 805, **806**
transmission of bean yellow mosaic virus to white clover 642
use of radioactive isotopes to test factors in hull rot of almond 851, **852, 854, 857, 858**
virus transmission by aphid vs. manual methods 419
temperature
effect on Ceratocystis fimbriata 668, **669, 670, 671, 672**
effect on colonization by Uromyces phaseoli 674, **676, 677, 678**
effect on development of Puccinia sorghi 224
effect on distribution of cotton boll rots 501, **502, 504**
effect on Gilbertella persicaria 572, **572, 573**
effect on interaction of potato viruses X and Y 576
effect on larval emergence of Heterodera glycines 350, **352**
effect on mosaic of Hibbertia volubilis 402, **403**
effect on potato viruses X and Y in tobacco 5, **7**
effect on Puccinia coronata 202
effect on reaction of wheat to stem rust 794, **795**
effect on response of Uromyces phaseoli 486, **487**
effect on Sclerotium rolfsii 110
effect on sporulation of Alternaria tomato 803, **804**
effect on susceptibility to Tropaeolum mosaic virus 413, **414, 415**
effect on symptom expression of Puccinia graminis 590, **591**
effect on Verticillium albo-atrum 66
in decay of sugar beet 3
in smut infection of barley and wheat 189, **190, 191**
of soil, effect on Criconemoides xenoplax 101, **102**
of soil, effect on Criconemoides xenoplax 101, **102**
of soil, effect on Pythium blight of bentgrass 578
of soil, effect on reproduction of Meloidogyne 520, **521, 522, 523**
of soil, effect on resistance of mint to Verticillium albo-atrum 169, **171**
optimum for germination of Sphaerotheca pannosa 699

NOTICE

Members of The American Phytopathological Society have received, *free*, copies of the Society's Monograph Number 1, Barley Yellow Dwarf, by G. W. Bruehl. *Libraries and members wishing additional copies may obtain them at $2.00 a copy from Dr. A. W. Dimock, R. D. 2, Ithaca, N. Y.* This price barely covers the cost of publication and mailing—thus, there is no discount for quantity purchases. This is a limited edition, so orders should be placed promptly.

CONTENTS OF VOLUME 51, 1961

No. 1—JANUARY

The inheritance of pathogenicity in Cochliobolus carbonum
R. R. Nelson and A. J. Ullstrup 1

Factors influencing storage decay of sugar beets by Phoma betae and other fungi
M. W. Cormack and J. E. Moffatt 3

Effect of temperature on the multiplication of potato virus X in the presence and absence of potato virus Y ..... Richard F. Stouffer and A. Frank Ross 5

The role of amygdalin breakdown in the peach replant problem ..... Richard B. Hine 10

Somatic recombination in Puccinia graminis var. tritici ..... Albert H. Ellingboe 13

Effect of source host on infectivity of tobacco mosaic virus isolates
R. C. Lindner, Hugh C. Kirkpatrick, and T. E. Weeks 15

The pathogenicity, distribution, and control of two races of Fusarium (Hypomyces) solani f. cucurbitae ..... T. A. Toussoun and W. C. Snyder 17

Uredospore production by Uromyces phaseoli ..... C. E. Yarwood 22

Trypan blue and boiling lactophenol for staining and clearing barley tissues infected with Ustilago nuda ..... Donald J. Morton 27

Relationship between tomato ringspot and peach yellow bud mosaic viruses
C. H. Cadman and R. M. Lister 29

In vitro nutrition of the tomato bacterial spot organism
M. V. Nayudu and J. C. Walker 32

Damping-off etiology especially in forest nurseries
O. Vaartaja, W. H. Cram, and G. A. Morgan 35

Annual Reports

52nd Annual Meeting of The American Phytopathological Society 43

Report and Abstracts of the 1960 Annual Meeting of the Pacific Division of The APS 64

Phytopathological Notes

Transmission of the ringspot virus of stone fruits from squash to squash by foliage contact ..... K. G. Swenson and G. P. Carpenter 68

Spread of petal blight of camellias by air-borne ascospores of Sclerotinia camelliae
Natale Zummo and A. G. Plakidas 69

Detection of hairy root pathogen, Agrobacterium rhizogenes, by the use of fleshy roots ..... Peter A. Ark and James P. Thompson 69

Possible identity of a fungitoxic compound from carrot roots
Ernest Sondheimer 71

The President's Column 73

News 74

Book Reviews

Diseases and pests of ornamental plants 9

Zemedelská Fytopatologie Dil 1 16

Handbook of Mycology 16

Handbook of Toxicology 34

No. 2—FEBRUARY

The sugar content of wheat leaves infected with stem rust
Norman E. Krog, Duane Le Tourneau, and Helen Hart 75

The fungicidal activity of acrolein phenylhydrazone and related compounds against rust ..... G. D. Thorn 77

A leaf blight of Cimarron oats ..... G. J. Ikenberry, Jr., and H. C. Young, Jr. 80

Relation of histochemical tests for phenols to Verticillium wilt resistance of potatoes
John G. McLean, Duane J. Le Tourneau, and James W. Guthrie 84

Leaf spot of sesame caused by Cylindrosporium sesami ..... R. G. Orellana 89

Isolation of Thielaviopsis basicola from bean rhizosphere
G. C. Papavizas and C. B. Davey 92

Cause and prevention of the rapid spread of the Ascochyta disease of chrysanthemum
KENNETH F. BAKER, A. W. DIMOCK, AND L. H. DAVIS 96
Factors affecting population levels of Criconemoides xenoplax B. F. LOWNSBERY 101
A comparison of virus isolates, dwarf-fruit and Spy 227-lethal DONALD CATION 104

SYMPOSIUM ON SCLEROTIUM ROLFSII

Summation ROBERT AYCOCK 107
Sclerotium rolfsii, history, taxonomy, host range, and distribution ERDMAN WEST 108
Physiology of Sclerotium rolfsii, with emphasis on parasitism G. M. WATKINS 110
Strains of, resistance to, and antagonists of Sclerotium rolfsii W. E. COOPER 113
Comments on Part I: Some gaps in our knowledge of Sclerotium rolfsii
COYT WILSON 116
The ecology of Sclerotium rolfsii, with emphasis on the role of saprophytic media
LYTTON W. BOYLE 117
Control of Sclerotium rolfsii through cultural practices KENNETH H. GARREN 120
Control of Sclerotium rolfsii with chemicals A. L. HARRISON 124

PHYTOPATHOLOGICAL NOTES

The toxicity of some chlorinated phenols and aryloxyalkanecarboxylic acids to Verticillium albo-atrum DUANE LE TOURNEAU AND LAWRENCE BUER 128
Cercospora leafspot of statice CURTIS R. JACKSON 129
Local infection of rice florets by the rice kernel smut organism, Tilletia horrida
G. E. TEMPLETON 130
Aphanomyces root rot of peas as affected by organic and minieral soil amendments C. B. DAVEY AND G. C. PAPAVIZAS 131
Red clover: A new host for potato virus X R. W. GOTH AND ROY D. WILCOXSON 132
THE PRESIDENT'S COLUMN 133
NEWS 134

No. 3—MARCH

Rolla Kent Beattie, 1875-1960 JOHN A. STEVENSON 135
Attraction of parasitic nematodes by plant root emanations DAVID R. VIGLIERCHIO 136
A synergistic Fusarium-nematode interaction in carnations
A. F. SCHINDLER, ROBERT N. STEWART, AND PETER SEMENIUK 143
Influence of Tylenchulus semipenetrans on the growth and chemical composition of sweet orange seedlings in soils of various exchangeable cation ratios
S. D. VAN GUNDY AND J. P. MARTIN 146
Effects of selected Cytospora isolates from stone fruits on certain stone fruit varieties
A. W. HELTON AND D. E. KONICEK 152
Strains of Pseudomonas solanacearum differing in pathogenicity in tobacco and peanut ARTHUR KELMAN AND L. H. PERSON 158
Complementary isolates of Phytophthora palmivora from cacao and rubber, and their taxonomy P. D. TURNER 161
The use of Fusarium culture filtrate media in the isolation of Fusaria from soil
J. R. PARMETER, JR., AND J. R. HOOD 164
Influence of soil, temperature, isolates, and method of inoculation on resistance of mint to Verticillium wilt S. Z. BERRY AND C. A. THOMAS 169
Resistance to the wildfire disease in relation to the gene-chromosome set ratio in tobacco J. H. SMILEY AND G. W. STOKES 174
Inoculating barley seedlings with Ustilago nuda and wheat seedlings with U. tritici
THOMAS KAVANAGH 175
Toxin production by Helminthosporium victoriae on synthetic media containing different nitrogen sources ROBERT W. BERRY AND MAURICE C. FUTRELL 177
The role of pectic substances in chemically induced resistance to Fusarium wilt of tomato L. V. EDGINGTON, M. E. CORDEN, AND A. E. DIMOND 179
Rod-shaped particles associated with virosis of spruce
M. ČECH, O. KRÁLIK, AND C. BLATTNÝ 183
Artificial inoculation of longleaf pine with Scirrhia acicola GLENN A. SNOW 186
Temperature in relation to loose smut in barley and wheat THOMAS KAVANAGH 189

PHYTOPATHOLOGICAL NOTES

Soil transmission of tobacco ringspot virus ... JAMES W. HENDRIX 194
Effect of auxins on virus-induced leaf abscission ... JOAN GWYNETH DYSON AND M. CHESSIN 195
Chemotaxis of zoospores of Phytophthora parasitica var. nicotianae by plant roots and certain chemical solutions ... P. D. DUKES AND J. L. APPLE 195
Corn gray spot caused by Piricularia grisea ... A. G. BAILEY AND C. VAN EIJNATTEN 197
Purification and electron microscopy of the peach yellow bud mosaic virus ... M. WEINTRAUB 198
Serological detection of barley stripe mosaic virus in single seeds and dehydrated leaf tissues ... H. A. SCOTT 200
A technique for inoculating leaves with root-knot nematodes ... N. T. POWELL AND E. L. MOORE 201
Relation of temperature to reaction type of Puccinia coronata on certain oat varieties ... DAVID E. ZIMMER AND JOHN F. SCHAFER 202
Sporulation of Pyrenophora bromi in culture ... J. F. CARTER AND J. G. DICKSON 204
A weed host of Xanthomonas phaseoli var. sojense ... JOHN P. JONES 206

No. 7—JULY

Comparison of aphid and manual methods for transmitting internal cork and associated viruses of the sweetpotato ... E. M. Hildebrand and F. F. Smith 419
Inheritance of resistance in cucumber mosaic virus
Slearm L. Wasuwat and J. C. Walker 423
The effect of age upon susceptibility of eastern white pine to infection by Cronartium ribicola ... R. F. Patton 429
Radish mosaic viruses ... J. C. Horton, G. S. Pound, and T. P. Pirone 434
A selective method for isolation and measuring the population of Pythium in soil
R. S. Singh and J. E. Mitchell 440
The effect of soil moisture upon development of poinsettia root rots D. F. Bateman 445
Seed transmission of bean mosaic viruses ... A. Crispin Medina and R. G. Grogan 452
The association of chlorotic leafspot virus of apple with decline of Spy 227 rootstocks
R. M. Gilmer and K. D. Brase 457
Respiratory changes during development of rust diseases
J. M. Daly, A. A. Bell, and L. R. Krupka 461
Symptomatology of the leaf-crumple disease in several species and varieties of Gossypium and variation of the causal virus
Donald C. Erwin and Ronald Meyer 472
The orchard development of peach powdery mildew ... Albert R. Weinhold 478
Relation of previous nutrition of gladiolus to infection by Stromatinia gladioli
Charles J. Gould and Thomas S. Russell 482

Phytopathological Notes

Temperature conversion of rust response of bean ... Richard D. Schein 486
Behavior of western X virus in well-rogued peach and cherry orchards
A. W. Helton 488
Plant-to-plant transfer of stone fruit ringspot virus in squash by pollination
C. R. Das and J. A. Milbrath 489

Oat smut races of the South Atlantic states
H. H. Luke, P. L. Pfahler, and S. J. Hadden 490
The influence of reducing substances on resistance to bacterial wilt in tobacco
E. C. Maine and A. Kelman 491
Effect of oxygen tension on growth of Aphanomyces euteiches
R. T. Sherwood and D. J. Hagedorn 492
News 494
Book Listings 428, 451

No. 8—AUGUST

Studies on control of black rot of crucifers by treating seeds with antibiotics
J. M. Klisiewicz and G. S. Pound 495
Severity and distribution of cotton boll rots as related to temperature
P. M. Halisky, W. C. Schnathorst, and M. A. Shagrun 501
Potential pathogenicity of Pythium isolates from forest nurseries
O. Vaartaja and P. J. Salisbury 505
Physical barriers associated with resistance in Fusarium wilt of bananas
C. H. Beckman, M. E. Mace, S. Halmos, and M. W. McGahan 507
Aphid transmission of barley yellow dwarf virus in Wisconsin
G. B. Orlob, D. C. Arny, and J. T. Medler 515
Rate of reproduction of Meloidogyne spp. as influenced by soil temperature
Ivan J. Thomason and Bert Lear 520
Girdling of grapevine canes by Melanconium fuligineum P. D. Critopoulos 524
Viscosity of naphthenic and paraffinic spray oils in relation to phytotoxicity and Sigatoka disease control on banana leaves
L. Calpouzos, N. E. Delfel, C. Colberg, and T. Theis 528
An anomalous effect of pentachloronitrobenzene on the incidence of damping-off caused by a Pythium spp. Ian A. S. Gibson, M. Ledger, and E. Boehm 531
Peroxidase activity in virus-infected sweet potatoes G. Loebenstein and N. Linsey 533
Race groups of Tilletia caries and Tilletia foetida for varietal-resistance testing
E. L. Kendrick 537
Properties and serology of purified cauliflower mosaic virus
T. P. Pirone, G. S. Pound, and R. J. Shepherd 541
Sowbane mosaic caused by a seed-transmitted virus C. W. Bennett and A. S. Costa 546
A mutation for resistance to potato virus Y in pepper A. A. Cook 550
Microorganisms on cucumber seedlings Curt Leben 553
Tree nutrition and fire blight development
K. G. Parker, N. S. Luepschen, and E. G. Fisher 557
Antihost serum improves plant virus purification A. Herbert Gold 561
A seed-borne bean virus of wide host range C. B. Skotland and D. W. Burke 565
Effect of variation in the bacterial spot pathogen of pepper and tomato on control with streptomycin P. L. Thayer and R. E. Stall 568
Relation of temperature to spore germination, growth, and disease development by Gilbertella persicaria
Joseph M. Ogawa, Edward E. Butler, and Stuart D. Lyda 572
Report and abstracts of the 1960 meeting of the Northeastern Division of The American Phytopathological Society 574

The possible relation of manganese to stem cankers in red oak Eldon W. Ross 579
A comparison of wound-tumor and tobacco club-root M. I. Selsky 581
Deposit rate and spray oil composition in relation to phytotoxicity and Sigatoka disease control of banana leaves
L. Calpouzos, C. Colberg, T. Theis, and N. E. Delfel 582
Injuries on cantaloupe leaves associated with laminal guttation away from marginal hydathodes S. S. Ivanoff 584
News 586

No. 9—SEPTEMBER

Comparison of ascospores and conidia of Pyrenophora bromi for incitement of brown leaf spot of Bromus inermis
M. J. Kaufmann, P. N. Drolsom, and E. L. Nielsen 587
The effect of postinoculation temperatures on seedling reaction of selected wheat varieties to stem rust ..... K. R. Bromfield 590
Movement of nonvolatile, diffusible fungicides through columns of soil
Donald E. Munnecke 593
Comparative pathogenicity of Sclerotium rolfsii and Rhizoctonia solani to Spanish peanut ..... L. J. Ashworth, jr., B. C. Langley, and W. H. Thames, jr. 600
Economic significance of best Western yellows (radish yellows) on sugar beet
James E. Duffus 605
Relation of some edaphic factors to Agrobacterium tumefaciens ..... Robert S. Dickey 607
Relative concentration of cucumber mosaic virus in a resistant and a susceptible cucumber variety ..... Slearm L. Wasuwat and J. C. Walker 614
Effects of concentration of host nutrients on parasitism of Piptocephalis xenophila and P. virginiana ..... A. L. Shigo, C. D. Anderson, and H. L. Barnett 616
Germination of chlamydospores of Fusarium solani f. phaseoli in unsterilized soils
T. A. Toussoun and William C. Snyder 620
Effects of storage environment on "in vitro" hatching of larvae from cysts of Heterodera schachtii Schmidt, 1871 ..... D. R. Viglierchio 623
Colonization of organic matter in the soil by fungi ..... L. E. Tyner 625
Phytophthora megasperma, the principal cause of seed-piece rot of sugarcane in Louisiana ..... T. van der Zwet and I. L. Forbes 634

Phytopathological Note

Fungi associated with larvae of Sitona spp. ..... R. A. Kilpatrick 640

Report and abstracts of the 37th annual meeting of the Southern Division of The American Phytopathological Society 642
Bibliography of Reviews, 1960 647
News 662

No. 10—OCTOBER

Bacterial stem and leaf rot of dieffenbachia in Florida ..... Lorne A. McFadden 663
Influence of environmental temperatures on metabolic alterations related to resistance in sweet potato roots infected by black rot T. Akazawa and I. Uritani 668
Some effects of temperature during the colonization period of bean rust
Richard D. Schein 674
Species of Leptosphaerulina on forage plants ..... J. H. Graham and E. S. Luttrell 680
Saprophytic behavior of Rhizoctonia in soil ..... G. C. Papavizas and C. B. Davey 693
Temperature and moisture requirements for germination of conidia of Sphaerotheca pannosa from peach ..... Albert R. Weinhold 699
Nutrition in relation to the development of wilts and root rots incited by Fusarium in red clover ..... C. C. Chi and E. W. Hanson 704
Salt injury to trees ..... Francis W. Holmes 712
Host range, spore germination, and pathogenicity of Diporotheca rhizophilum
C. C. Gordon, C. G. Shaw, and J. D. Menzies 718
The spreading decline complex: the separate and combined effects of Fusarium spp. and Radopholus similis on the growth of Duncan grapefruit seedlings in the greenhouse ..... William A. Feder and Julius Feldmesser 724
Protection of cucumber seedlings from stone fruit ringspot virus by 8-azaguanine
Hugh C. Kirkpatrick and R. C. Lindner 727
Host range and properties of the globe artichoke curly dwarf virus
Donald J. Morton 731

Phytopathological Notes

Phytophthora parasitica, the cause of root rot, canker, and blight of boxwood
Frank A. Haasis 734

Evidence of gene pools for pathogenicity in species of Helminthosporium
R. R. Nelson 736

Book Listing 703

News 738

No. 11—NOVEMBER

Hans Theodor Güssow, 1879-1961 A. J. Skolko 739

Effect of infection by potato virus Y on the concentration of potato virus X in tobacco plants Richard F. Stouffer and A. F. Ross 740

Verticillium wilt of strawberry controlled by fumigation of soil with chloropicrin and chloropicrin-methyl bromide mixtures
Stephen Wilhelm, R. C. Storkan, and J. E. Sagen 744

The relative survival ability of races of Phytophthora infestans in mixtures
H. David Thurston 748

Serological studies of red node and pod mottle viruses
H. A. Scott, Monroe Vincent, and W. J. Zaumeyer 755

Evidence for functional cytochrome oxidase in tissues infected by obligate parasites
J. M. Daly and S. G. Jensen 759

Production of cell-wall dissolving enzymes by Cladosporium cucumerinum in cucumber tissue and in artificial media D. L. Strider and N. N. Winstead 765

Some metabolic changes accompanying infection by barley yellow dwarf virus
G. B. Orlob and D. C. Arny 768

Free amino acid constitutions of healthy and scab-infected cucumber foliage
Clyde L. Burton and Donald J. deZeeuw 776

Pathological histology, hosts, and culture of the potato rot nematode
L. R. Faulkner and H. M. Darling 778

Pathogen variability and breeding Verticillium wilt resistant strawberries
R. S. Bringhurst, Stephen Wilhelm, and Victor Voth 786

Effect of variations in temperature on the reaction of temperature-sensitive wheat varieties to wheat stem rust K. R. Bromfield 794

Phytopathological Notes

A method of maintaining viability and ability to sporulate in isolates of Ascochyta
L. H. Person 797

Use of 1,2-dibromo-3-chloropropane as a fungicide against Pythium ultimum
Bill B. Brodie 798

Sterile culture techniques as tools in plant nematology research
Tsen-an Chen, R. A. Kilpatrick, and Avery E. Rich 799

Inoculation technique for determining tolerance of Pisum sativum to Aphanomyces euteiches W. A. Haglund and T. H. King 800

Separation and identification of some viruses infectious to cucurbits R. E. Webb 802

Radiation and temperature interaction on the sporulation of Alternaria tomato
Minoru Aragaki 803

A technique for studying relative soil populations of two Fusarium pathogens of garden peas Gayle L. Worf and D. J. Hagedorn 805

Trichodorous christiei as a vector of potato corky ringspot (tobacco rattle) virus
C. H. Walkinshaw, G. D. Griffin, and R. H. Larson 806

Cultural variation in Endothia parasitica J. O. Andes 808

The pipe cleaner, an inexpensive tool for inoculating plants with viruses
K. W. Kreitlow 808

A strain of barley yellow dwarf virus transmitted specifically by the corn leaf aphid W. F. Rochow 809

The President's Column 811

Writing for Phytopathology 812

News 814

No. 12—DECEMBER

Effect of concentration, exposure time, temperature, and relative humidity on the toxicity of sulfur dioxide to the spores of Botrytis cinerea
H. Melvin Couey and M. Uota 815
The pathogenic relationship of Clitocybe tabescens to peach trees
Donald H. Petersen 819
Kinetic study of the heat inactivation of tobacco mosaic virus infected centers and potentially infectible sites on Nicotiana glutinosa
Jia-Hsi Wu and Irving Rappaport 823
A bacterial disease of philodendron ..... H. N. Miller and Lorne A. McFadden 826
Bioassay of tobacco ringspot virus in Cassia occidentalis
D. A. Roberts and M. K. Corbett 831
Tobacco ringspot virus in sweet potato and its host range in Nicotiana
E. M. Hildebrand and A. E. Kehr 833
Transmission of tobacco mosaic virus in tomato seed
R. H. Taylor, R. G. Grogan, and K. A. Kimble 837
Hull rot disease of almonds ..... C. J. Mirocha and E. E. Wilson 843
Effect of Dutch elm disease on seedling elms ... Toru Arisumi and Daniel J. Higgins 847
Role of fumaric acid in the hull rot disease of almond
C. J. Mirocha, J. E. DeVay, and E. E. Wilson 851
Growth and sporulation of Guignardia bidwellii ..... Paul G. Caltrider 860
Reduction in water flow in soybean stems by a metabolite of Cephalosporium gregatum ..... Donald W. Chamberlain 863
The President's Column 865
